

Sciur*

Enjoy sustainable fashion

Sciur is a tech-enabled network of shared clothing racks located in Milanese boutiques. We make quality sustainable clothing accessible for young people using a flexible subscription model to rent clothes – reshaping self-expression through fashion, subsequently uplifting the local industry and reducing waste.

Knitting our ideas • ECOSYSTEM MAP

Milan is one of the European capitals of fashion and headliner of worldwide trends. The city has a huge impact on the global fashion industry, and is equally impacted by it. The clothing industry's system is broken. Majority people can't access quality sustainable clothing because of expensive pricing.

Moreover, a person in Italy creates as much as 7.2 kg of clothing wastage per year. With the ever changing trends and fast fashion, young people specifically struggle with finding an identity with clothing. They care about quality sustainable clothing, but feel trapped by this system.

On the other hand, the Covid-19 pandemic has had grave repercussions on the small neighbourhood shops/boutiques, resulting in small businesses shutting down. It is interesting to note that there are plenty creators/designers working towards no-waste sustainable clothing but they do not have platform to be heard. Starting your own business in Milan is a daunting task.

We see this as an opportunity to come up with an innovative solution that can bring about a systemic change in the way fashion system works by reforming the consumption behaviour of people and the concept of ownership of clothes.

Garment flow

Information flow

Financial flow

1. Local boutiques receive the garments from the creators and make the selection to put on the Sciur rack
2. Users can explore the Sciur's garment offerings at the boutiques and rent them
3. Users return the items they don't wish to keep for longer to the Sciur system
4. Sciur does the cleaning of the garments and then decides if the garment can go back to the rack in the shops, sent to the creators to rework/ upcycle or finally to the recycling centers.

Service Orientation • VALUES

Sciur puts focus on Milan's context and all stakeholders' needs and habits to have a positive impact on their behaviours.

People Centric

People in Milan

Needs → Strategies → Impact

Be able to explore clothing options to feel confident in what they wear	a decentralized network of racks with diverse clothing styles	positive change in consumer behaviour from exclusive clothes ownership to renting clothes
---	---	---

Be able to access ethically produced and manufactured quality clothing	tie-up with independent creators and small brands to acquire sustainably produced clothes tie-up with local boutiques to house the racks with acquired pieces of clothing	strengthening the local networks of relationships inside each neighbourhood
--	--	---

have affordable options and not end up having a closet full of clothes they don't wear	a subscription-based renting service	make sustainable behaviors diffuse easily, being more accessible
--	--------------------------------------	--

Society Oriented

Independent Creators Small clothing brands

being able to enter and penetrate a tough market as a small business owner	a shared-risk based acquisition of garments to put on racks as rentals Providing a platform to showcase their values	having a following that can create word-of-mouth and help them grow creating direct connections with customers
--	---	---

Society Oriented

Local boutiques

be able to attract more and new customer base	opportunity to put a sciur* rack with a shared vision of clothing displayed	brings in a new client base, increases footfall and opportunity to increase sales
be able to move beyond a neighbourhood shop to have a city-wide presence	showcasing the boutiques' details on our open sciur network map	creates a buzz in the city about the boutique, thus attracting more people

Business Viability

Sciur makes ethical sustainable garments accessible for people at an affordable price. We have developed a subscription-based business model for the service provision.

We onboard independent creators, small business owners and local boutiques by taking an annual fee that puts them into our network. There on, we work with them on a shared-risk basis dependent on the renting of each item and the overall circulation of clothes within the Sciur network.

The onboarding users get a +1 garment rental for a month on any pack they take subscribe to. There's always a possibility to upgrade packs in order to rent more pieces of clothing.

[Click here for minimum viable business projection](#)

According to sustainable and ethical clothing industry standards, we put a **markup of 200%** on the garments.

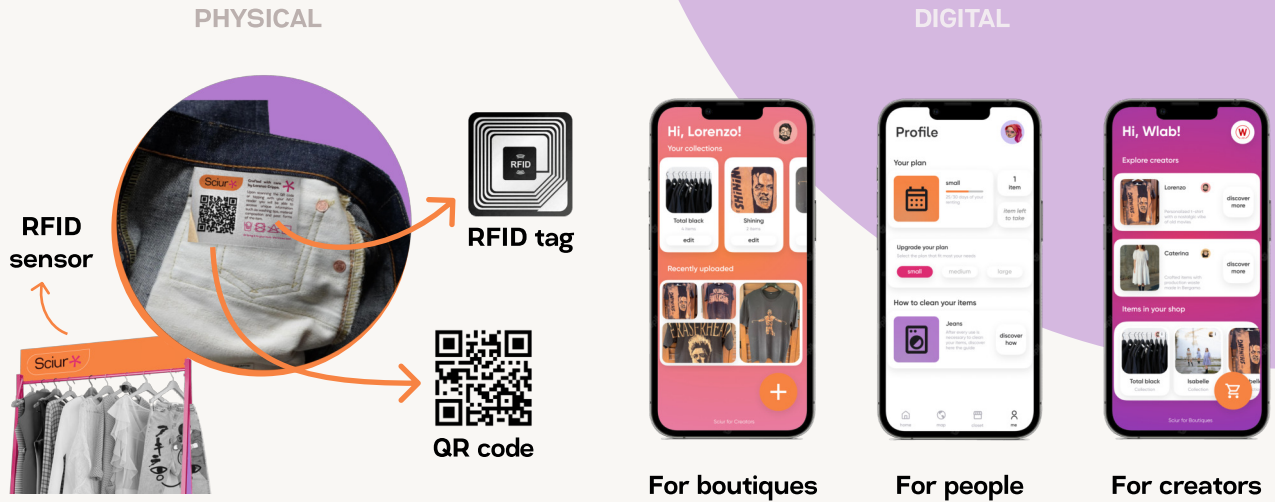

The rental price for each garment per month will be **10%** of its original selling price.
The producer, seller and Sciur each get **40%, 10%** and **50%** of the share respectively.

In **4 months**, the producer recovers the production cost. Post which, all the parties start making profit on that garment.

How does it Work?

● SCIUR TOUCHPOINTS

Check our prototype here!

Sciur is tech-enabled for seamless operations and management, as well as highlights the importance of using tech for good. We leverage on the Radio Frequency Identification (RFID) technology to facilitate communication between garments and people, track the item and give essential information and instructions to people about the manufacturing of the garment, maintenance information and their contribution in moving towards being environmentally, socially and economically

conscious consumers. Each rack has an RFID sensor and every garment has an RFID tag attached to it. Moreover, we use digital tech- the Sciur app to relay relevant information to all the actors involved; be an active space that gives a platform and voice to conscious producers & consumers of clothes; and facilitate transaction of items and money.

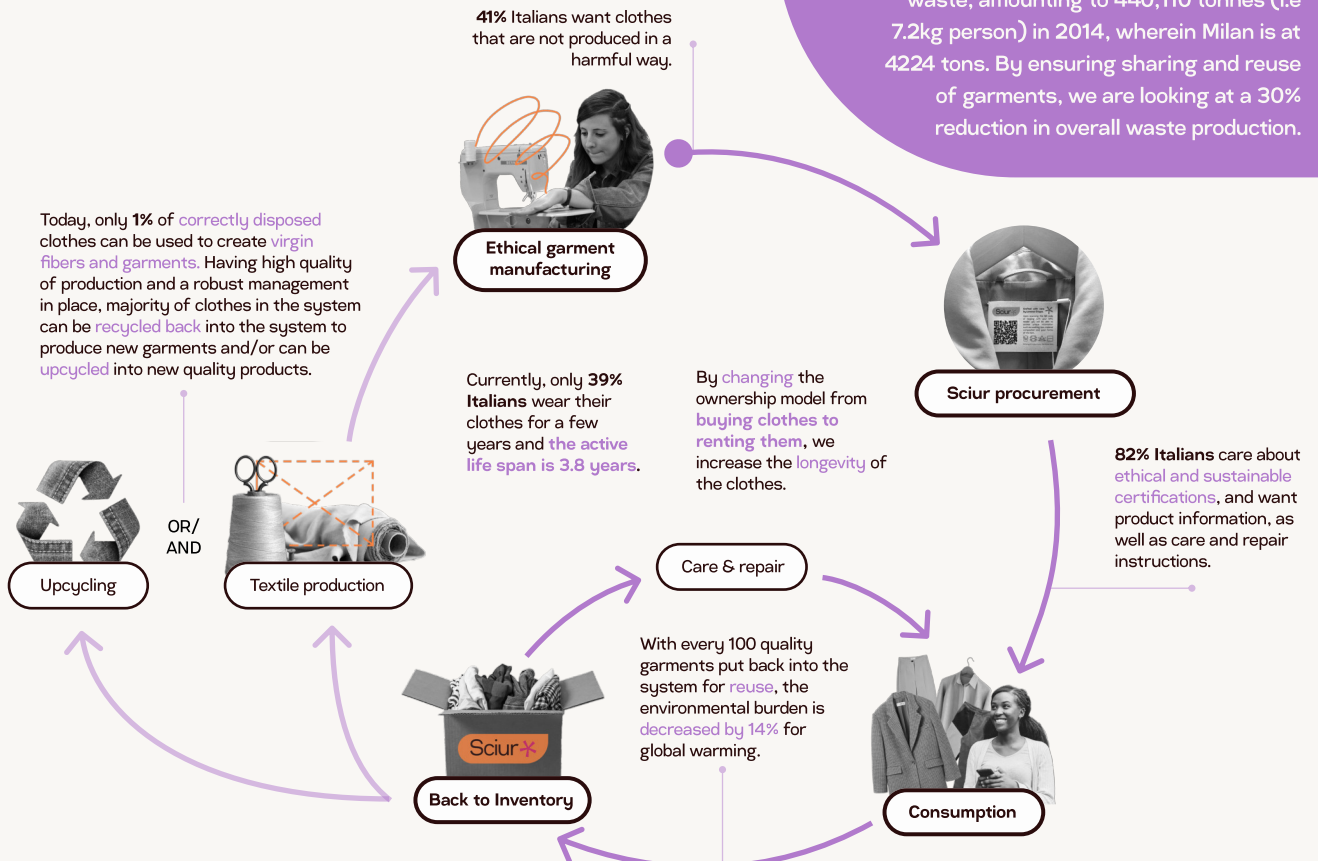

Student Service Design Challenge 2022

Road to Circularity

● SUSTAINABLE LIFE CYCLE

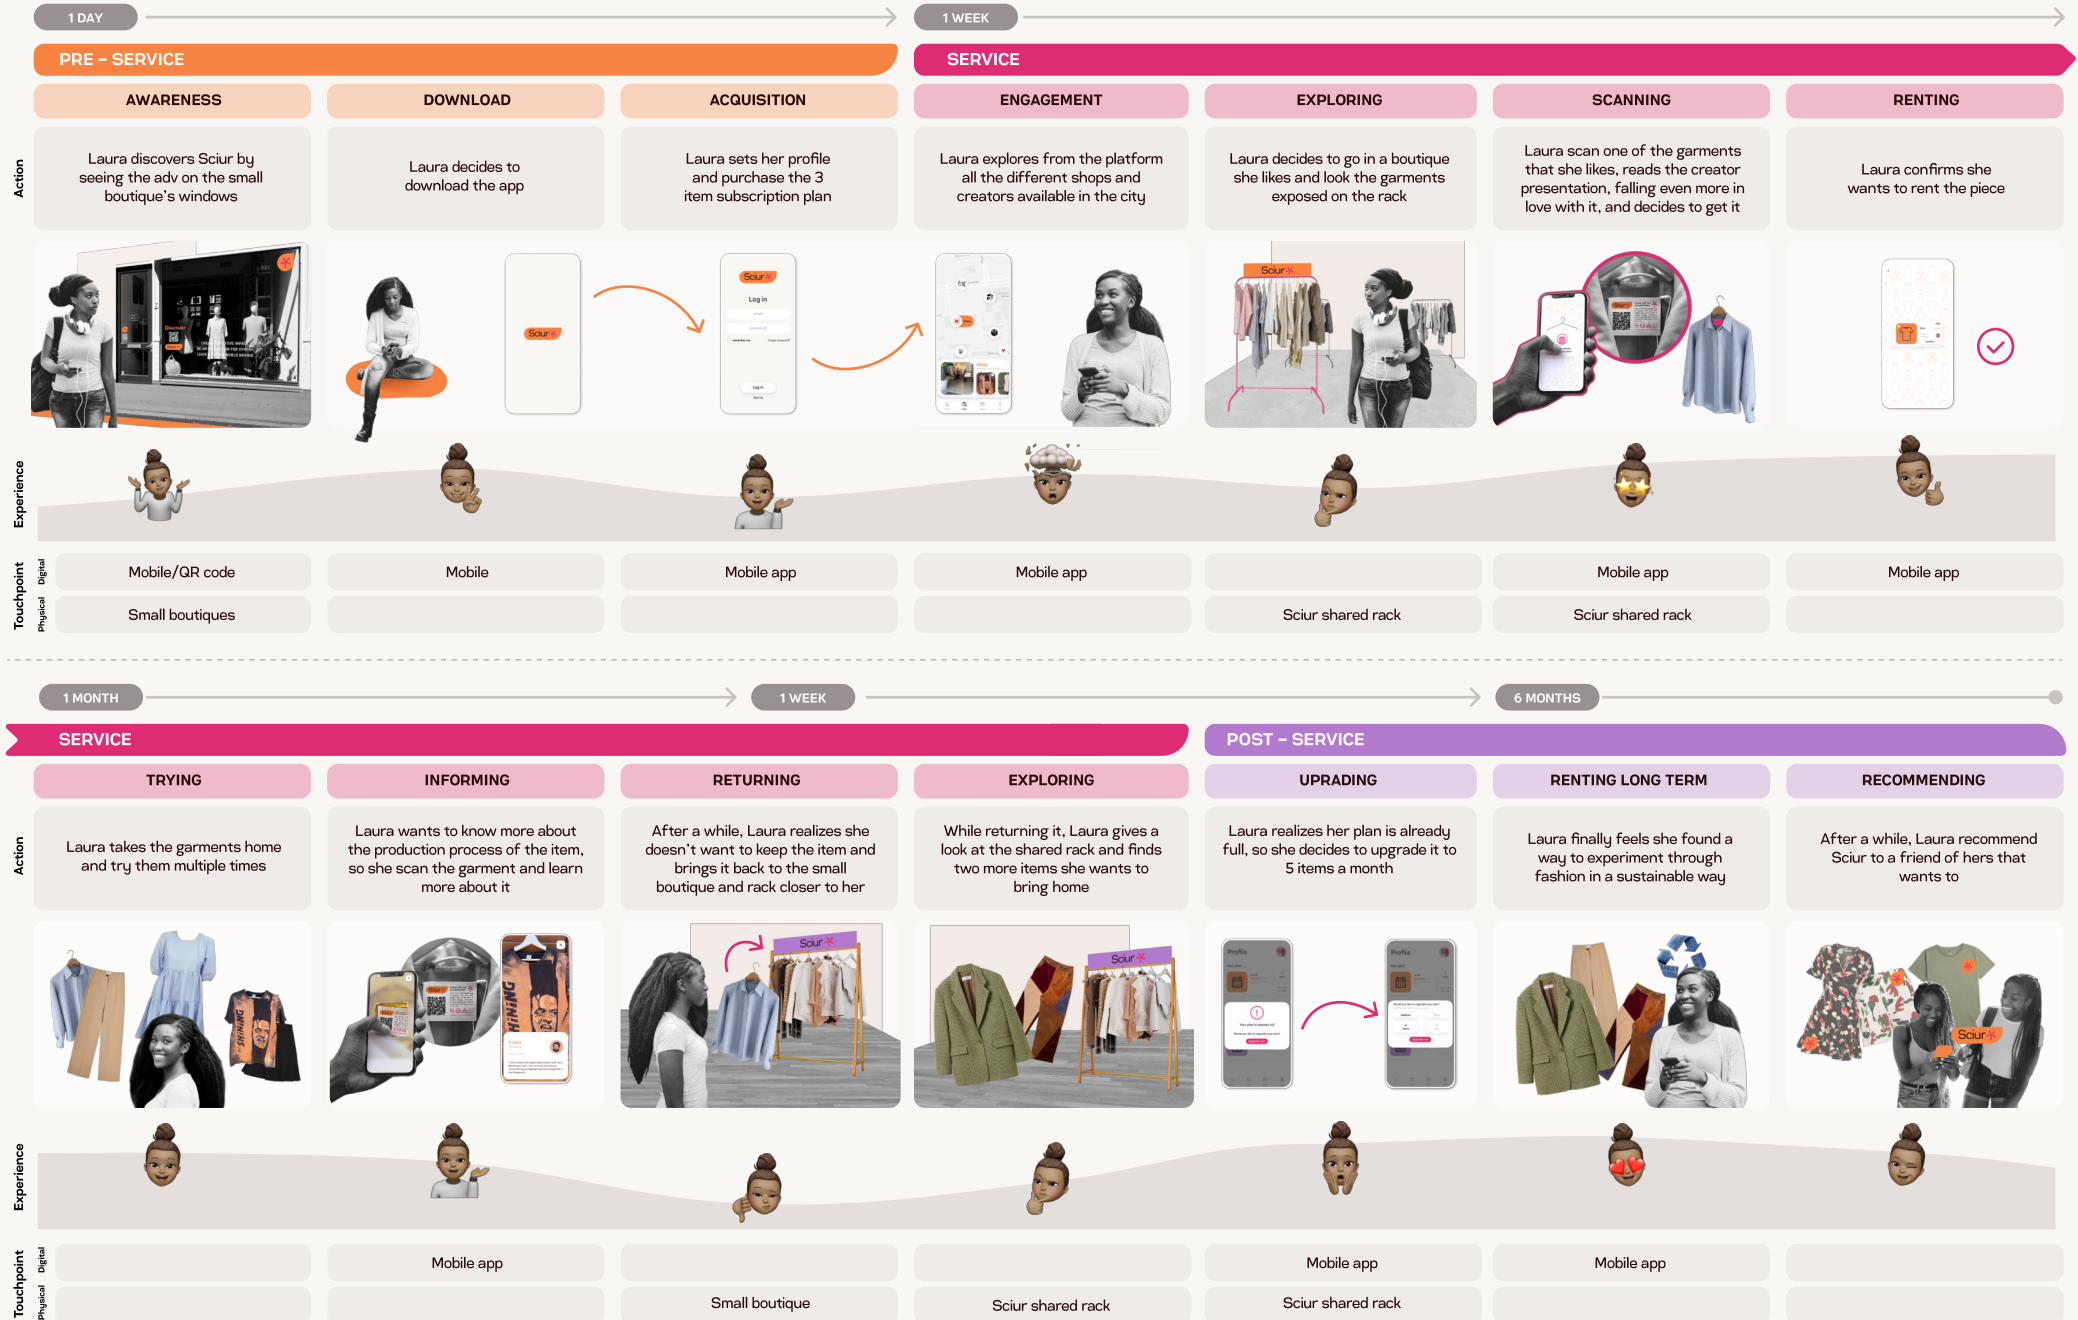

DID YOU KNOW?

Italy has the highest clothing in residual waste, amounting to 440,110 tonnes (i.e 7.2kg person) in 2014, wherein Milan is at 4224 tons. By ensuring sharing and reuse of garments, we are looking at a 30% reduction in overall waste production.

CUSTOMER JOURNEY MAP • WALK THE TALK

Sciur provides seamless experience for the users from star-to-end, transforming their consumption behaviour from owning clothes to renting them. The journey map highlights the significance of having both physical and digital touchpoints to engage the customer and make their experience sensorial. The ability to feel the fabric, try the garment and learn about the creators and the creation is impactful and rewarding.

Key resources

Space for shared racks in the local boutiques.
Sensors and components for smart rack system.
Clothing items to be rented.
Human resources.

Key activities

Digital platform and app maintenance.
Delivery of smart rack and RFID systems.
Constant stakeholder engagement and customer assistance.
Marketing and promotion.
Administration.

Key partners

Local laundries.
Tech company.
Sorting and recycling social projects or companies.

Ecological VP

The life-cycle of garments becomes circular and shared, increasing usage and reducing environmental impact.

Human VP

The relationship with clothing is no more compulsive: increased freedom to find your self-expression.

Service VP

Easily access to sustainable and quality clothing.
Reduced risks to waste.
Increased flexibility to rent.

Access to new young clients, advertising, digital services. A new channel to get revenues from clothes.

Local actors uplifted in comparison to fast-fashion firms. Relational network strengthened. Ethical production.

Social VP

Human needs

Freely express yourself.
Explore clothing options to feel confident in what they wear.

Target audience

Young busy people, not confident with their clothing style, caring about sustainability, willing to explore more.
Local clothing boutiques reselling brands or with internal production.
Independent clothes creators and designers.

Key relationships

Subscription models creating a long-lasting and trusted relationship with shops and creators.
Physical shops perceived as part of personal wardrobe.
Digital relationship and assistance for stakeholders.

Key channels

Physical shops in the city.
Mobile application and web app for customers.
Website for marketing.
Web app for shops and creators to manage the service.

Cost structure

Paying human resources.
Tech infrastructure maintenance.
Smart rack system production and delivery.
Marketing campaigns.

Revenue streams

Subscriptions of customers renting items (split percentages between Sciur, creators, shops).
One time fees to cover onboarding costs for shops and creators.
